Feature Layers

- ROAD
- ROAD_HIDDEN
- LINE
- MOUZA-THK
- HOME TYPE
- HOME TYPE_2
- TREE

Click here to see the different layers

5. In the maps, various layers like road, line etc are also available which is displayed above and can be seen by checking on the boxes .

6. If you have selected sheet-no, then click on the plot(daag-no) by mouse. Once the daag-no is selected the above pop up is displayed where the link for 'Map Preview' and 'ROR' is given along with the other details like total area, owner's name etc. Click on the map preview in order to check if the daag-no for which you want to take the print is coming correctly.

7. Once the map preview is seen, the link for 'receipt' will get activated in the popup as above that is generated for the map preview & ROR. Fill in all the details in the page of receipt generation. Click on 'print receipt'. Once you do so, the button for print map will get automatically enabled. And after filling details of receipt, a receipt no. will be generated.

Receipt Generation [Close\(X\)](#)

| | | | | | |
|------------|----------------------|-----------|----------------------|---------|---------------------------------------|
| First Name | <input type="text"/> | Last Name | <input type="text"/> | Sex | Male <input type="button" value="v"/> |
| Mouza | ২০১১৭ | Khatian | ১/১০ | Plot | ৪৮২ |
| Sheet No. | 1 | Amount | <input type="text"/> | Page(s) | 1 |

Map Receipt No. : 201300004

Note down this receipt no.

8. Note down the receipt no. because this no. can be used in future use also if the print of the receipt could not be taken on the first attempt. For that on the right hand side, under miscellaneous report, put the noted receipt no. on the textbox provided for Re-print receipt as shown below and take print out of the receipt that is missed.
